STAT
Dear

I am very pleased to convey to you the attached letter of commendation from Mr. Thaler, Acting Director of the Office of Telecommunications Policy. Your outstanding contribution to this important assessment project is a credit to the Agency and illustrative of the accomplishments attainable through community cooperation. Thank you for a job well done.

I have asked that Mr. Thaler's letter be made a part of your permanent record.

Yours sincerely 

STANSFIELD TURNER

Mr. William J. Thaler
Acting Director of
Telecommunications Policy
Washington, D. C. 20504

Dear Mr. Thaler:

STAT
STAT
Thank you for taking the time to call to my attention [redacted] contribution to the assessment program being coordinated in your office. It is gratifying to know that CIA's recognized expertise, and that of [redacted] in particular, has been valuable in this important national effort. Please be assured of my continuing support.

Yours sincerely,

[redacted]

OFFICE OF TELECOMMUNICATIONS POLICY

EXECUTIVE OFFICE OF THE PRESIDENT

WASHINGTON, D.C. 20504

September 22, 1977

DIRECTOR

Honorable Stansfield Turner
Director of Central Intelligence
Washington, D.C. 20505

Dear Admiral Turner:

STAT I am writing to call your attention to the contribution of [] of your Agency to the Federal Government's program to assess biological effects of nonionizing electromagnetic radiation being coordinated by this Office.

The CIA is a valuable part of these activities due to its recognized expertise in analyzing foreign scientific publications and in evaluating research and associated issues within the context of a country's technology, societal and political background. This is most important in light of increasing national and international concern, media coverage, and focus on the apparent differences in concepts of hazards and protective standards throughout the world -- particularly between the US and USSR.

As your Agency's representative, [] comprehensive knowledge and familiarity with foreign research and regulatory processes in this area and his excellent professional understanding of the technical basis for these activities have contributed greatly to developing a better understanding in this field and have substantially influenced the directions of the current Federal program. Throughout his several years association with this program, his opinions and counsel have been highly valued and sought after by other Government agencies and the scientific community involved.

STAT [] has never failed to generate prompt and highly professional counsel to all associated with this program. His considerable insight and perspective

into the implications and interpretation of foreign research and his expert understanding of the interdisciplinary interactions between the biological and engineering/physical sciences are a credit to the Agency and a valuable contribution to this important national effort.

I wish to express our appreciation for your continuing support and, in particular, for [redacted] contribution.

STAT

Sincerely,

[redacted]

25X1

William J. Thaler
Acting
